Science Heritage Journal (GWS)

Editorial

The aim of the journal is to serve the theological community with information provided and arranged to help them better understand the new scientific discoveries and studies that may be connected by their relevance to their own field or in associated fields. On the other hand, the interested scientists may find here new insights or a more profound attempt of understanding of the results of their research work. GWS also reflect ethical, environmental and societal implications of the work performed by scientists and technologists, intending to contribute actively to international debates on these issues
